## Benefits provided to clients of CreativeSites

1. Our website development is based on **the latest know-how and technologies** that constantly evolve. We observe these trends and apply them in our work, which contributes to increased satisfaction of our clients. Included in our website development, we offer expert counseling in the latest web trends and the latest internet technologies.
2. We develop internet sites that are fully search engine optimized (SEO – Search engine optimization) and are displayed on the first positions in the search results.  
**Search engine optimization** includes tuning tens of **on-page factors** (factors located on the website) and **off-page factors** (factors outside the website). We offer expert SEO consultation to our clients, on how to keep the search engine optimization in mind when entering the website content.
3. **Search engine friendly URL addresses** in format, for example:  
*www.company.sk/products/chair-adela/* are specially developed for perfect search engine optimization.  
Content management system automatically generates search engine friendly URL addresses even for multilanguage website versions. Our clients have the option to modify and configure the search engine friendly URL addresses.
4. We develop websites according to the **latest web standards XHTML, CSS and WCAG**. These websites fulfill all accessibility requirements, visitors can view and read the sites on their mobile phones, PDAs, and the sites are blind-accessible.  
Our specialty is also an **error-free website code**. Websites are functional in all major web browsers used today.
5. Internet sites are developed on a **professional level** with respect to **customer's time needs**. If a client desires to launch an internet project in a short time period, we are able to deliver this project in the shortest time possible.
6. **Individual client approach** - every client is provided sufficient room for explaining his ideas about the project. Based on analysis of the requirements, we design the most suitable solution together with the client.
7. **Flexible and dynamic team** - we are flexible and able to quickly and effectively transform client's requirements into reality. All our clients, a global company representative, small family business owner, or a director of a giant internet portal, are welcomed in a family atmosphere.
8. **Custom web programming** - for the requirements for web application custom programming, we ensure development and services according to the client's specific needs.  
We hereby continually expand functionality of the offered web applications (e.g., internet shop, content management system, etc.).

9. **Everything under one roof** - professional website development, webdesign, content management system, SEO - search engine optimization, internet marketing, custom web programming, flash animations and banners, webhosting, registration into catalogs, consultations, ...
  
10. **Website and web application consultations** - company CreativeSites offers quality support for all offered products. Constantly updated manuals and an online assistant are always available to our clients in the administration section of the content management system.
  
11. Our websites and portals are blind accessible (BlindFriendly) according to the strict **accessibility standards**.
  
12. We are the only company in Slovakia that offers **multidomain and multisubdomain system**. Your websites may function on a single content management system, on multiple domains and subdomains at the same time, for example:

*EN version - [www.example.com](http://www.example.com)  
DE version - [www.beispiel.de](http://www.beispiel.de)*

*EN version - [chairs.firma.com](http://chairs.firma.com), [tables.firma.com](http://tables.firma.com), [furniture.firma.com](http://furniture.firma.com)  
DE version - [stuehle.firma.de](http://stuehle.firma.de), [tafeln.firma.de](http://tafeln.firma.de), [moebel.firma.de](http://moebel.firma.de)*
